

MALO CLINIC

THE ART OF CREATING SMILES

MAKALO COMES ALIVE!

It is with huge pride and emotion that MALO CLINIC announces its new partnership. This time, with the Lisbon Zoo.

MAKALO, who started as our mascot in the area of Pediatric Dentistry - dental specialty exclusively dedicated to the maintenance of oral health in infants, children and adolescents - has come to life and is now also the name of the most recent lion cub born in his Zoo habitat, under the watchful eye of his parents who, at the time of his birth, were naturally thrilled with the arrival of their new offspring.

Aware of the importance of preservation and protection of animal life, MALO CLINIC views this patronage as a natural challenge to its moral principles: taking care of others as we take care for ourselves.

In August 10th, World Lion Day is celebrated worldwide thanks to the work of the BIG CAT RESCUE, an accredited sanctuary for the largest cats in the world. The preservation of this species requires a conscious and full action so that the risks of extinction are no longer a concern.

Join us on this celebration day and many more to come: meet little MAKALO live at the Lisbon Zoo and be sure to schedule a dental appointment for your "youngsters".

Together we are stronger!

IN PARTNERSHIP WITH
