

# Everything's possible

A profound shame for their dental state made Liliana, Vânia and Justina hide their smiles. Follow us to see how MALO CLINIC changed their lives.

**Liliana Carneiro** is 34 years old and lives in Valongo. Dental problems began in her adolescence, and the lack of economic resources made it worse. Liliana's job involved constant interaction with people and she was extremely embarrassed by her teeth every time she opened her mouth. Her biggest dream was to have a 'smile of my own' that would bring back the quality of her life and self-esteem.

**Vânia Dias** is 23 years old and lives in Braga. A bicycle fall dictated that at a mere age of 10, she had to start wearing her first prosthesis. Over the course of time, she began to lose more teeth and at the age of 20, she had only two teeth in the upper jaw. Vânia was one of the youngest patients contemplated for the program 'Portugal a Sorrir', from 'Você na TV' television show, TVI.

A few days from Christmas, the real spirit of this holiday season was revealed with the first special case of support to the victims of the fires. **Justina Jesus**, at a young age of 34 years, had a life course marked by difficulties that were aggravated by the tragedy of the massive fires. Last July, she lost her loving grandmother, all her dear pets and the fires added fuel to her miseries. Get to know how a smile can make a huge difference in the life of this beautiful lady from Pegogão and see why it is so rewarding to help those who need it most.
