

Everything's possible

After years of suffering, Hélder and Ana can finally face the future with a new smile. See how MALO CLINIC has changed their lives.

Hélder Correia is 51 years old and lives in Funchal. Natural from Madeira Island, he grew up at a humble and numerous family where oral hygiene or dentist appointments were never a priority. Lifelong difficulties never allowed him to put on a removable prosthesis, so he was forced to hide his smile.

Ana Surrécio is 49 years old and lives in Alter do Chão. Economic difficulties and some traumatic experiences have kept her away from the dental office. With only 3 teeth in her upper jaw Ana has also never worn a removable prosthesis. Her biggest desire is to be able to feed herself properly and also to be able to socialize with family and friends.
