

# Everything's possible

Together with FOR (Foundation for Oral Rehabilitation), MALO CLINIC continues to change lives and distribute happiness, giving a new smile to people like Carla, who has faced countless difficulties and a deep depression that worsened her dental problems, taking away all her confidence, or like the incredible Lucrécia, a mother who, for her unparalleled courage facing all the adversities life has brought her and her family, deserved to be able to smile. Get to know their stories a little better...

Unemployed for over a year, **Carla** was living for a long time with dental problems that she could not overcome, which caused her great anguish. Problems that got worse as a result of health and emotional complications: A serious illness and a divorce led her to a state of deep depression. This affected her self-esteem, confidence and courage, damaging her relations with other people. When she came to us she had numerous teeth missing, which harmed her not only from an aesthetic point of view, but also in terms of phonetics and chewing. Now, with a new smile, she says that everything has changed and that she can now "smile to the world". She emphasises that "the MALO CLINIC team was wonderful" and that "their work was fantastic"!

**Lucrécia** is truly a "mother courage" who has always fought to overcome the many difficulties she has encountered over the years in order to provide decent living conditions to her children and grandchildren. After giving a new smile to her son Jovane, who for several years suffered from a missing front tooth, we felt that Lucrécia deserved even more, so we gave her and her other children the dental treatments they needed to look at the world with a beautiful, healthy smile.
